Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. **Claims 1-21** are classified in class 707, subclass 102.
- II. **Claims 22-31** are classified in class 711, subclass 173.

The inventions are distinct, each from the other because of the following reasons:

Inventions in *Groups I-II* are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable (MPEP § 806.05(d)). In the instant case, invention in *Group I* describes a data product containing data structures with map-related information, and map management information. Invention in *Group II* describes the steps of altering the management information to indicate the physical storage positions at which the update data are stored.

Because these inventions are distinct for the at least reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purpose as indicated is proper.

Applicant expressed his will to have the restriction requirement in writing after a telephonic communication made on October 6, 2008 to Jeffrey Sanok (Reg. No. 32,169) via (202) 624-2500.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Response time for this Office action is one month (30 days).
